Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 5-10 are pending in this application.

Request for Continued Examination (RCE)

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 4, 2004 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 5-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Miyamoto et al. (JP Pat. Application No. 63-66109).

Miyamoto teaches a skin cosmetic having a skin-beautifying effect. The composition contains traumatic acid, which is contained in the pods of kidney beans. The traumatic acid can be extracted from the kidney beans by heating the plant in water or in an organic solvent such as alcohol, ether, benzene or chloroform. The suitable

amount of traumatic acid that is incorporated into the composition is in the range of 0.01-2 wt% based on the total amount of skin cosmetic material. The cosmetic material can be utilized in lotions, milky lotions, creams and facial packs. Finally, the composition is used to repair or improve the inherent skin function and maintain the healthy condition of skin and the effect is particularly recognizable when the materials are utilized on aging skin. It is the position of the examiner that although the reference is silent on using the composition for treating suppressing wrinkle formation, it is known to one of ordinary skin that wrinkles are a product of aging skin.

Response to Declaration

3. Applicants filed a declaration under 37 CFR 1.132, identifying the components of kidney bean extracts as traumatic acid, phytic acid and aspartic acid. In the declaration an experiment containing phytic acid and traumatic acid was performed to demonstrate the effectiveness on collagen. It was found by applicants that phytic acid responds better than the traumatic acid on collagen. Therefore, applicant argue that phytic acid is far more excellent that traumatic acid. While, this may be true, applicant has not described in the specification, claims or by way of examples what the preferred extracts of the kidneys beans are. Therefore, one of ordinary skill in the art having the prerequisite knowledge that kidney bean and kidney bean pods have a common extract, could use the extract in a formulation for the skin.

Conclusion

4. Claims 5-10 are rejected.
